

NID PAPER 2026

Q1. A story given about a Guru and an Idiot man, asked to draw 3 illustration on the key points. (15 Marks)

A Guruji is travelling in a palki along a pathway, accompanied by his group of disciples and followers. As the procession moves forward, an idiot man suddenly stands in the middle of the path and stops the palki. He insists that the Guruji must come down and meet him, only then will he allow the group to proceed. The followers consider the man foolish and try to ignore him. Observing this, the Guruji calmly steps out of the palki and approaches the man. The man respectfully asks, "Guruji, can you please show me the way to heaven?"

The Guruji replies simply, "The path to heaven is very easy. Raise your hand towards the sky and stand here at this very place." The Guruji and his followers then continue their journey, leaving the man standing there with his hand raised. After twelve years, the Guruji passes through the same place again. He notices the same man still standing in the exact position. However, the man's appearance has changed. His beard has grown long and dense, his clothes are torn, dusty, and grey, showing the passage of time. The Guruji steps closer and realizes that the man's soul is now leaving his body and rising towards the sky. Understanding that the man has attained heaven through devotion and patience, the Guruji immediately holds onto the man's feet. As the soul ascends, both the Guruji and the man are lifted together, moving towards heaven.
